* - Other underwriting expenses include acquisition costs as well as changes in life & annuity funds and other investment contracts

** - Other income includes profit from deposit administration, other operating income and share of profit from associate

*** - Other expenses include impairment and finance costs Figures in this release are subject to rounding differences.

Commenting on the results, Mr. Babatunde Fajemirokun, the Managing Director and Chief Executive Officer said, *“In 2022, AllCO Insurance reported strong results with ₦88.3 billion in gross premiums, a record for the company. The improvement in our operations is apparent – our financial position is even more stable, and our insurance operations were more profitable in 2022 than in 2021, especially in our general insurance and health maintenance businesses. We also continued to see momentum in our areas of strategic focus such as product development, automation and embedding digital across the organization. For 60 years, our customers have trusted us with their life savings, a testament to our reputation in the industry and the insurance market. As the company celebrates its diamond jubilee, our hope is that our customers continue to trust us for another 60 years at least, while resting assured that AllCO Insurance will continue to be there whenever we are needed.”*

Operational developments

- We completed the sale of our stake in AllCO Pensions to FCMB Group in Q1 2022.
- We also completed the process of distribution of FY 2020 bonus (12 shares for every 9 shares held) to shareholders in Q1 2022.
- The Company’s shareholders ratified a dividend of 2 kobo per share at the Annual General Meeting held on May 27, 2022. The dividend was paid to shareholders in June 2022.
- We completed the acquisition of Tangerine Life’s annuity portfolio in Q3 2022, improving our ability to take advantages of economies of scale and increase returns to shareholders. This added ₦30 billion to the total assets and liabilities.

Group Performance Review

Gross written premium grew by 23.3% y-o-y to ₦88.3 billion in FY 2022 (FY 2021: ₦71.6 billion). This was due to a y-o-y increase of 39.1% in General Insurance to ₦26.5 billion (FY 2021: ₦19.0 billion). Life Insurance premiums increased by 17.6% y-o-y to ₦61.1 billion (Q3 2021: ₦51.9 billion) and Underwriting income from our Health Maintenance Organization (HMO) increased 73.5% y-o-y to ₦1.6 billion (FY 2021: ₦950.6 million). Operating income in Asset Management declined by 22.2% y-o-y to ₦1.5 billion (FY 2021: ₦1.87 billion).

Profit before income tax from continuing operations increased to ₦4.5 billion in FY 2022 (FY 2021: ₦2.8 billion). Profit before income taxes across the company and its subsidiaries increased y-o-y contributing to the reported increase for the period. Improved underwriting performance in the insurance and health management businesses supported growth during the year compared to FY 2021. In 2022, the Company completed the sale of its stake in AllCO Pensions, recording a profit from discontinued operations of ₦2.9 billion. As a result, **profit for the year** rose by 39.5% to ₦6.9 billion in FY 2022 (FY 2021: ₦4.9 billion).

Review of statement of financial position

Total assets increased by 21.4% to ₦270.0 billion as of FY 2022 (FY 2021: ₦222.4 billion) driven mainly by a 29.6% growth in financial assets, which constitutes ca. 82.8% of the total assets. About ₦30 billion of this growth came from the acquisition of the Tangerine Annuity Portfolio.

Total liabilities increased by 22.8% to ₦226.0 billion as of FY 2022 (FY 2021: ₦184.0 billion). This was driven mainly by a 38.8% growth in insurance contract liabilities, which constitutes 73.6% of the total liabilities. About ₦30 billion of this growth came from the acquisition of the Tangerine Annuity Portfolio.

Total equity increased by 14.8% to ₦44.1 billion as of FY 2022 (FY 2021: ₦38.4 billion) mainly due to a 41.8% increase in retained earnings to ₦15.7 billion as of FY 2022 (FY 2021: ₦11.1 billion).

The Businesses

General Insurance

Growth in General Insurance was driven by an expansion in all product lines across the business except agriculture. Special Oil contributed most significantly to premiums in FY 2022 with 34.8% of total General Insurance premiums generated.

Growth in Special Oil reflects the increased confidence in our ability to underwrite large risks which stems from sustained growth in shareholders’ funds, a key focus of our strategy. In addition to Special Oil, Fire (18.3% of General Insurance premium) and Marine (17.4% of General Insurance premium) contributed most significantly to the growth in 2022, growing by 28.3%, and 15.3% y-o-y respectively as of FY 2022.

Underwriting profit grew by 176.1% y-o-y to ₦4.1 billion in FY 2022 (FY 2021: ₦1.5 billion) while investment and other income in the business declined by 6.5% y-o-y to ₦1.67 billion (FY 2021: ₦1.79 billion). Claims ratios also improved in FY 2022 vs FY 2021 declining to 30.3% from 48.1% in 2021.

Life Insurance

Performance in Life Insurance was driven by the 24.4% growth in Group Life (12.3% of total Life Insurance) to ₦7.5 billion (FY 2021: ₦6.0 billion) and 6.5% growth in Ordinary Life (76.9% of the Life business) to ₦46.9 billion (FY 2021: ₦43.7 billion). Premiums from our annuity business are also up from FY 2021, growing 198.4% to ₦6.6 billion compared to the same period last year. FY 2022 At AIICO, we continue to prioritize risk-conscious pricing and sound underwriting for our short- and long-term products, ensuring that our customers continue to enjoy benefits as long as their contracts remain in-force. Due to the Company’s expertise in creating value from the management of long-term liabilities, we continue to seek opportunities to acquire more portfolios, similar to the acquisition of Tangerine Life’s annuity, which was completed in 2022.

Changes in sovereign bond yields significantly impacted the value of our liabilities and assets. These movements are reflected in the change in Ordinary Life and Annuity Funds as well as fair value/realized gains or losses on the income statement. In the Life business, we are typically concerned about whether there is a surplus or deficit of assets over liabilities because of these movements. However, due to limitations in financial reporting, changes in liabilities affect underwriting profit while changes in assets are reported below underwriting profit. The effect is the significant variation in underwriting profits especially in volatile investment yield environments, such as we have in Nigeria. During 2022, yields were quite stable in the first half of the year but rose in the second half leading to realized and fair value losses on financial assets of ₦6.7 billion while the change in liabilities due to interest rate movements were ₦7.4 billion, leading to a surplus of ₦630.0 million of assets over liabilities from ALM operations.

AIICO Multishield

Underwriting Income, including fees, in AIICO Multishield, our HMO business increased by 73.5% y-oy to ₦1.6 billion (FY 2021: ₦950.6 million). Improvements in claims efficiency (claims ratio of 48.2% in 2022 (FY 2021: 54.4%)) and operations (operating expense ratio of 38.4% in 2022 (FY 2021: 48.5%)) led to a ten-fold increase in profit before tax to ₦329.1 million (FY 2021: ₦28.3 million).

AIICO Capital

Net operating income (including investment and other income) in our Wealth Management business declined by 22.2% y-o-y to ₦1.5 billion (FY 2021: ₦1.9 billion) due primarily to reduced trading income. Cost to income ratio rose in 2022 on the back of reduced income during the year (56.8% in FY 2022 vs 39.0% in FY 2021).

Outlook

In 2023, global growth is expected to drop to 1.7% from 3.0% expected in 2022. "Global growth has slowed to the extent that the global economy is perilously close to falling into recession" according to the World Bank. This sluggish growth in the economy can also be attributed to the United States, the euro area, China's pronounced weakness, global monetary policy tightening and negative shocks. Higher-than-expected inflation, abrupt rises in interest rates, reduced investment, and disruptions caused by Russia's invasion of Ukraine could push the global economy into recession. The World Bank President, David Malpass recently stated that China is a "key variable" in restoring the global economy: the sheer size of the Chinese market means that upturns or downturns will have global implications. On the bright side, Inflation is expected to moderate in 2023 as central banks act decisively to get ahead of the inflation problem. The financial sector continues to remain resilient in the wake of repeatedly high interest rates.

The anticipation for the general elections, which is only a few weeks away, is growing significantly as this is a consequential moment for Nigeria. First and foremost, the path towards democratic development in Africa, most especially west Africa and other parts of the world could be significantly impacted by a successful election. Nigerians have high expectations for the new administration in terms of prioritizing the economy: stabilizing interest rate and inflation, tackling security challenges as the last couple of years have been challenging. While the IMF expects a decline in inflation in 2023, the expected removal of the petroleum subsidy along with FX and food supply constraints will very likely signal sustained high inflation throughout the year. When we consider this in conjunction with the government's revenue and spending plans, all signs point to elevated yields in the sovereign debt market. In general, analysts believe 2023 will be marked by uncertainty with a lot depending on the outcome of the upcoming elections.

As the industry finally transitions to IFRS 17, we expect to see some uncertainty in the industry as well, as insurers grapple with the change. It heralds a complete shift in insurance reporting, removing a lot of the variety and increasing comparability among firms. AIICO Insurance has made the requisite investments to ensure a smooth transition to the new standard with no impact on our operations. Our financial position and cashflows remains robust, providing a much-needed comfort to our customers that the company is on this journey with them. Sound risk management continues to underpin all our strategic decisions, giving us a solid base and reassuring customers that AIICO remains judicious in the management of their savings.

Definition of terms

Gross premium written refers to combination of premiums for general, life (individual and group), annuity, and health management

Gross premium income refers to premiums received which have been earned in the financial period under review. Premiums are paid for a period and are only earned fully when the Company has fulfilled its duties for that period.

Net premium income refers to gross premium income less applicable reinsurance expense.

Change in life and annuity funds refers to the change in the insurance or investment liability in the life business. The liability changes as policies are underwritten and interest rates, upon which some liability valuations depend, change.

Benefits refer to planned pay-outs to policyholders who purchase insurance policies in our life business. Benefits are classified as claims in our financial statements; however, they are not contingent liabilities (they do not depend on an event to trigger payment).

Claims refer to contingent liabilities that arise because of an event that is covered by an insurance policy.

Total underwriting expenses refer to the direct costs of providing insurance. They include cash line items like claims, benefits, and acquisition costs as well as non-cash line items such as change in life and annuity funds.

Investment income refers to income from policyholders' funds, annuity funds and shareholders' funds as well as investment income from asset management activities.

Total operating expenses refer to the sum of employee benefits expense and other operating expenses.

Profit before tax refers to underwriting profit (loss), personnel expenses, other operating expenses, finance cost, and impairment loss less investment income, profit from deposit administration, net realised gains, net fair value gains, and other operating income.

Profit after tax refers to profit before tax less income tax.

About AIICO Insurance Plc

AIICO Insurance Plc (NGX: AIICO) is a leading composite insurer in Nigeria with a record of accomplishment of serving our clients that dates back over 50 years. Founded in 1963, AIICO provides life and health insurance, general insurance, and investment management as a means to create and protect wealth for individuals, families and corporate customers.

The Life Insurance segment offers savings, protection products and other long-term contracts (both with and without insurance risk). It comprises a wide range of whole life, term assurance, guaranteed pensions, pure endowment pensions and mortgage endowment products. Revenue from this segment is derived primarily from insurance premium, fees and commission income and investment income.

The General Insurance segment comprises general insurance to individuals and businesses. General insurance products offered include auto, household, commercial and business interruption insurance. These products offer protection of policyholder's assets and indemnification of other parties that have suffered damage as a result of policyholder's accident.

The Health segment is a Health Maintenance Organization for prepaid health plans to cater for the health needs of individuals and corporate organizations. The segment became a full subsidiary of AIICO Insurance Plc on July 1, 2012.

The Asset Management segment is registered and licensed by the Securities & Exchange Commission in 2012, to carry out portfolio/fund management services. The segment commenced full operations in 2014 through the provision of bespoke wealth solutions for clients, by adopting a research-based approach for every investment decision. The segment offers portfolio management services, structured investments and mutual funds to suit the investment needs of corporate and individual clients.
